

Canadian Architectural Certification Board Equitable Climate Action Commitment

As an association representing architectural educators and practitioners, the Canadian Architectural Certification Board (CACB) has a responsibility to address climate change mitigation (emissions reduction) and adaptation (responding to the impacts we cannot avoid) through timely and ethical climate planning and action in an integrated model for Equitable Climate Action.

The Intergovernmental Panel on Climate Change *Special Report on Global Warming of 1.5°C* states that due to climate change, unprecedented action is required to keep global heating below the threshold of 1.5°C. 2020 initiated a ten-year countdown before the effects of climate change – which is projected to be the world’s largest health and economic crisis – become irreversible.

Climate change is a social, political, and ethical issue with profound implications for the health, safety, and well-being of people and communities worldwide, especially poor and marginalized populations. Climate change is causing a variety of unavoidable impacts, which are projected to increase in duration, magnitude and severity. In the years ahead, these impacts will affect the outcomes of professional decisions made today.

If we are to minimize risk and maximize co-benefits within the timeframe set by the IPCC, Equitable Climate Action addressing mitigation, adaptation and equity is required urgently. Equitable Climate Action can save time and resources, increase returns on investment, and generate economic, environmental, social, and health co-benefits. Taking a human-centred approach to climate action protects the rights of the most vulnerable and shares the burdens of climate change, and the resources required to manage its impacts fairly.

To advance awareness, education, practice and policies that support Equitable Climate Action, the CACB commits to:

	Commitment	Action Areas
1	Recognize the ethical and practical implications of climate change and global heating for the CACB, architectural educators, and practitioners.	Research and Knowledge Development; Policy and Planning
2	Set Equitable Climate Action as an organizational priority, with carbon neutrality and equity as the primary outcomes.	Standards and Certification; Operational Practices
3	Implement recognized monitoring and reporting processes for accountability on organizational Equitable Climate Action. Report annually on status.	Standards and Certification; Monitoring Evaluation and Reporting; Operational Practices

	Commitment	Action Areas
4	Support education and training for the Directors, CACB administration, and promote education and training for partner associations and affiliates in climate change science, best practices, tools, equity, implementation and approaches to climate action.	Professional Development and Education; Research and Knowledge Development; Best Practice, Resources and Support
5	Promote Equitable Climate Action with partner associations and between affiliates. Collaborate to gain shared understanding of best practice and support capacity-building.	Best Practice, Resources and Support; Collaboration and Partnerships
6	Cooperate with all levels of government to advance Equitable Climate Action.	Government Relations
7	Provide leadership in the public sphere to advance understanding and support for Equitable Climate Action amongst the public, decision-makers and stakeholders.	Marketing and Public Engagement; Collaboration and Partnerships

CACB Directors
